ReSound Live™

Just like going from a set of stereo speakers to a fully customized surround sound system, ReSound Live™ delivers a unique surround sound experience.

With a greater sense of awareness—of being there—you'll enjoy fuller, richer and more detailed sound quality. You'll be able to locate where sounds are coming from more easily and enjoy conversations even in noisy environments.

Experience sounds the way they were meant to be heard. Sounds in full detail. Sounds in surround.

**SURROUND
SOUND**
by ReSound™

PUT YOURSELF BACK IN THE PICTURE

“ I'm no longer overwhelmed by situations or feel left out, which just changes everything for me. When you're not worrying about missing out on conversations or things happening behind you, it gives you a huge boost of confidence. ”

SURROUND SOUND BY RESOUND™

At the core of ReSound Live is our exclusive surround sound processing platform. Just like a surround sound speaker system, it processes bass and treble separately, providing a rich, smoothly-blended listening experience. You will benefit from:

- fantastic sound quality
- clearer understanding of speech and conversation in noisy situations
- improved awareness of surroundings
- enhanced ability to locate sounds

SOUND BY DESIGN

The wide variety of ReSound Live hearing instrument models offers an unbeatable mix of invisibility and comfort on the ear with superior performance and flexibility.
