Sparx™

ReSound Sparx™

ReSound Sparx™ was specifically created with the super-power user in mind.

This remarkable fusion of **power** and **sound quality** will enhance every aspect of your life – from conversations with family and friends to listening to the sounds of every day living.

The **power** you demand

When you listen to ReSound Sparx™ you can't help but notice the added power it delivers. But, power is useless if it is accompanied by constant feedback (annoying whistling sounds) --- as is often the case with other super-power hearing instruments. ReSound Sparx™ controls feedback by accurately predicting when feedback will occur and suppressing it before you can hear it.

ReSound Sparx combines the power you need with excellent feedback control to ensure the comfort you deserve.

"My Sparx hearing aids are great! They're much more powerful than my old aids and even when I turn them up, they don't squeal."

From competitor hearing instruments to ReSound Sparx™

Sound quality beyond compare

This sophisticated super-power hearing instrument can be precisely fine-tuned to provide you with the sound quality you prefer.

When you listen to ReSound Sparx, you will experience maximum volume with unparalleled sound quality. ReSound Sparx not only enables you to consistently hear the sounds of speech, but it also allows you to appreciate the countless sounds of the world you live in.

"I never used to be able to hear the birds. When I changed to the ReSound Sparx I heard all sorts of sounds that I had not heard in a long time."
